October 2017 Car of the Month

## LaDell & Bernie Yada - 1972 VW Convertible

Our 1972 Volkswagen Super Beetle convertible is just plain fun to drive! Anybody that has owned or driven a VW will certainly appreciate that comment! In March of 2015 I saw an ad on Craigslist Spokane for it. The price seemed appropriate for the condition so we bought it. The previous owner said it was the cleanest VW I would find and he was pretty right about that! What is more important, is what he didn't say, is that it had probably the weakest motor I would find in a VW that still ran! It had been many years since I had driven a stick, and he could tell, so he told me he would deliver it to Moses Lake. He actually towed it here and now in hindsight I think it was because he wanted to make sure it got here! Long story short, after an engine rebuild by Mike Bauer and some new tires we had ourselves a pretty fun "ride"! This VW marks about the 5<sup>th</sup> VW we have owned over the years including a 57, 66, and 70 Ghia, 69 auto stick and now this 72. Our adult daughter will be the recipient of this car when I stop driving it. She drove a 66 Bug in high school and she too was been bitten by the "Bug"! She will be a good caretaker of this iconic piece of automotive history! A creaky left knee, that gets sore using the clutch, may speed up the transition from our garage to hers!
